Tangible Data Merging

Instructions for the teacher:
 a. Use a different color of paper for each of the two datasets. For example, Dataset 1 (pg. 1 & 2) could be on plain white paper, and Dataset 2 (pg. 3 & 4) could be on blue paper.
 b. Cut the paper by creating horizontal strips of each observation of data. For example, for page 1, you would create 12 different strips of paper, one for each observation.

Dataset 1

Birth Month	Zip Code	Age	ID Number	Favorite Movie
January	90064	21	1742	The Notebook
